

Developmental Biology Center Friday mini symposium & happy hour

**Friday, September 15th, 3:00-5:00 p.m.
Natural Science Bldg., Room 1114**

Refreshments and snacks will be served

3:00	Welcome and announcements
3:15 – 3:40	Maike Sander “Molecular control of progenitor cell maintenance in the pancreas”
3:45- 4:10	Peter Kaiser “Proteolytic and non-proteolytic functions of ubiquitin”
4:15 –4:30	Break
4:30 – 4:55	Lee Bardwell MAP kinase docking interactions: To see and be seen
5:00	Happy hour

Dear Colleagues,

The **Developmental Biology Center** invites you to a series of Friday afternoon mini symposia to facilitate and promote interactions among research labs across campus. This is open to all members of the UCI research community (Grad students, post docs, 199s, research staff and PIs) who have an interest in these issues.

Refreshments will be served followed by Happy Hour at 5. This is a great chance to meet folks from other labs and exchange reagents and ideas. Please share this email with any interested parties that we may have missed.

Thanks Larry

To facilitate planning for refreshments and seating, it would be helpful if you would RSVP to Jan Strudwick jstrudwi@uci.edu (x45957).

Future dates: Oct 20, Nov 17, Dec 15, Jan 19, March 2.

Announcements can be found on <http://dbc.bio.uci.edu/>
